Selected experience and project outcomes · Prepared October 2026

01 | Professional Profile

Results-driven digital banking and product professional with more than six years of experience spanning technical product management, business analysis, channel support, digital lending, SME banking and operational transformation. Experienced in taking initiatives from discovery and requirements definition through Agile delivery, UAT, release readiness, adoption monitoring and continuous improvement.

My work sits at the intersection of business, technology and customer experience. I translate operational and customer needs into clear requirements, align multidisciplinary stakeholders, support delivery teams and track outcomes against business objectives.

Core value proposition

- **Product leadership:** product strategy, roadmap execution, lifecycle management, backlog prioritisation and commercialization.
- **Business analysis:** requirements elicitation, BRDs, FRDs, process mapping, user stories, acceptance criteria and gap analysis.
- **Delivery:** Agile/Scrum, UAT planning and execution, defect triage, release management and post-implementation monitoring.
- **Digital banking:** SME lending, supply chain finance, digital channels, onboarding and customer experience.
- **Performance:** KPI monitoring, revenue analytics, operational improvement and stakeholder reporting.

Professional experience

Channel Support Officer, Business Solutions Department · FirstBank of Nigeria Limited · Jul 2026–Present

Coordinate Business, Technology, Operations and vendor stakeholders on channel enhancements, digital lending rollouts, transactional issue resolution, UAT, release readiness and service improvement.

Technical Product Manager, Supply Chain Finance · FirstBank of Nigeria Limited · Apr 2022–Jul 2026

Owned product strategy, roadmap execution, development, commercialization and lifecycle management for Contract Finance, Invoice Discounting Finance and LPO Financing products serving SME and Commercial Banking customers.

Customer Service Representative · HR Indexx Ltd · Oct 2020–Feb 2022

Managed 120+ daily customer interactions through CRM platforms and supported service-quality and customer-experience improvements.

Operations Manager (Remote) · The Bethel’s Initiative · Oct 2019–Oct 2020

Managed distributed teams, strengthened operating processes, developed partnerships and supported fundraising and programme delivery.

02 | Selected Business Impact

314% Revenue growth across Supply Chain Finance	**167%** Improvement in product deployment efficiency	**92%** Customer retention achieved
69% Reduction in SME onboarding turnaround time	**98%** Relationship-manager data-mapping issues resolved	**120+** Customer interactions managed daily

Additional leadership outcomes

- Increased organisational funding by 15% through donor engagement, proposal development and stakeholder relationship management.
- Established three strategic partnerships with NGOs and private-sector organisations.
- Raised more than ₦1,000,000 through fundraising and stakeholder engagement for community programmes.

How I approach measurable outcomes

I connect delivery activity to a defined baseline, target and business measure. Depending on the initiative, this may include revenue, customer retention, onboarding turnaround time, deployment efficiency, issue-resolution rate, adoption, service quality or operational risk.

03 | Selected Project Case Studies

These are public-safe summaries. They intentionally omit customer names, internal system details, confidential architecture and non-public operational data.

CASE STUDY 01 | Digital Supply Chain Finance

Context: SME and commercial customers needed more accessible ways to obtain financing against contracts, invoices and purchase orders. Product growth also depended on coordinated business, technology, risk and operations execution.

Role: Technical Product Manager responsible for product strategy, roadmap execution, lifecycle management, stakeholder alignment and delivery governance across Contract Finance, Invoice Discounting Finance and LPO Financing.

Approach: Prioritised product improvements around customer needs and business value; coordinated requirements and workflow reviews; supported customer acquisition and engagement; monitored revenue and retention; and aligned cross-functional teams around implementation readiness.

Reported outcomes: 314% revenue growth, 167% improvement in deployment efficiency and 92% customer retention.

Capabilities demonstrated: Product strategy · Commercialisation · Stakeholder management · Workflow optimisation · KPI monitoring.

CASE STUDY 02 | Digital SME Onboarding

Context: Traditional SME onboarding processes created friction and extended the time required to bring customers onto banking services.

Role: Managed the digitisation of SME onboarding journeys, coordinating business requirements and delivery activities across relevant stakeholders.

Approach: Reviewed the customer journey, supported process digitisation, clarified requirements, coordinated implementation and monitored the resulting turnaround time.

Reported outcome: 69% reduction in SME customer onboarding turnaround time.

Capabilities demonstrated: Customer journey optimisation · Business analysis · Process transformation · Delivery coordination.

CASE STUDY 03 | Digital Lending Enablement

Context: Suppliers and vendors required more convenient digital access to financing products, while business teams needed digital capabilities aligned with operational and control requirements.

Role: Led product and business coordination for digital lending initiatives supporting Invoice Discounting and LPO Financing.

Approach: Translated business needs into requirements and process flows; coordinated engineering, technology vendors, Operations, Legal, Risk, Compliance and business teams; managed backlog priorities; and supported UAT, defect triage, release readiness and post-launch monitoring.

Outcome: Digital access to relevant financing journeys, supported by structured implementation and operational readiness.

Capabilities demonstrated: Requirements engineering · Agile delivery · API-enabled product environments · UAT · Release management.

04 | Further Digital Delivery Experience

SME and corporate digital banking capabilities

- **Digital banking platform enhancements:** Supported SME lending, temporary overdrafts and Supply Chain Finance capabilities through a digital banking channel.
- **Secure authentication:** Coordinated implementation of soft-token authentication capabilities for SME and corporate banking customers.
- **API-enabled delivery:** Served as Technical Product Manager across four enterprise-scale digital banking initiatives built on REST API architecture and .NET product environments.
- **Requirements and delivery artefacts:** Authored or coordinated BRDs, FRDs, business process flows, API integration schema requests, user stories, acceptance criteria, implementation agreements and functional specifications.
- **Issue resolution:** Resolved 98% of relationship-manager data-mapping issues through structured collaboration with a technology partner and internal teams.

Current channel support

In my current Business Solutions role, I coordinate channel enhancements and digital lending rollouts; facilitate UAT and defect triage; monitor release readiness; support adoption tracking; and work with internal teams and partner banks to investigate transactional complaints affecting agents and merchants.

Delivery lifecycle

DISCOVER	DEFINE	DELIVER	IMPROVE
Understand customer and business needs	Document requirements, journeys and acceptance criteria	Prioritise, coordinate build, test and release	Monitor adoption, service issues and performance

05 | Product & Business Analysis Toolkit

Product management

Product strategy · Product discovery · Roadmap execution · Product lifecycle management · Backlog prioritisation · Product governance · Commercialisation · Go-to-market execution · Product optimisation.

Business analysis

Requirements gathering · BRDs · FRDs · User stories · Acceptance criteria · Gap analysis · Process mapping · Workflow optimisation · Business process re-engineering · Functional specifications.

Delivery and technology

Agile/Scrum · Project coordination · Change management · UAT planning and execution · Defect triage · Release management · Deployment readiness · REST API integration · System integration · Post-implementation monitoring.

Data, reporting and customer experience

Advanced Excel · Power BI · Business intelligence · Revenue analytics · KPI reporting · Performance monitoring · Management reporting · Customer journey optimisation · Digital adoption · CRM platforms.

Tools and environments

Microsoft Excel · Power BI · Microsoft Visio · Microsoft Project · Jira · Confluence · Microsoft 365 · CRM platforms · UAT frameworks · .NET product environments · FinTrak Credit 360 · FirstOnline · Digital lending platforms.

Banking domain knowledge

Supply Chain Finance · Contract Finance · Invoice Discounting · LPO Financing · SME Lending · Commercial Banking · Digital Payments · Digital Channels · Banking Operations · Operational Risk · Regulatory Compliance · Process Automation.

Working style

Structured and outcome-oriented; comfortable working across business and technical teams; attentive to customer experience, delivery governance, operational controls and measurable value.

06 | Leadership & Social Impact

Executive Director · Transforming Life Initiatives · 2025–Present

Provide strategic leadership and governance oversight across a seven-functional management structure covering Programmes, Legal Advisory, Finance, Communications, Onboarding, Partnerships and Governance.

• Designed and launched community-intervention programmes supporting vulnerable children and youth development.

• Raised more than ₦1,000,000 through fundraising initiatives and stakeholder engagement.

• Established public- and private-sector relationships to strengthen programme sustainability and impact.

Operations Manager (Remote) · The Bethel's Initiative · 2019–2020

• Managed distributed remote teams across multiple programmes, with performance tracking and accountability practices.

• Increased organisational funding by 15% and established three strategic partnerships.

• Implemented performance-tracking systems and standard operating procedures to improve delivery quality.

Leadership strengths

Strategic planning · Governance · Partnership development · Fundraising · Remote team coordination · Volunteer and programme leadership · Stakeholder engagement.

07 | Education & Professional Development

Portfolio note

This portfolio is a professional summary based on my CV. Project descriptions are intentionally high-level and exclude confidential customer information, internal documents, proprietary system configurations and restricted banking data. Performance figures are self-reported and can be supported with appropriate evidence where requested by a prospective employer.

Thank you for reviewing my work.
